

L15 ANSWER 6 OF 16 CAPLUS COPYRIGHT 2005 ACS on STN

ACCESSION NUMBER: 1990:606731 CAPLUS
DOCUMENT NUMBER: 113:206731
TITLE: Plant growth-regulating compositions containing
brassinosteroids and poly(oxyethylene)
sorbitan fatty acid esters
INVENTOR(S): Sakai, Shinichi; Shida, Atsuhiko; Saito, Mikio;
Nishitani, Takeshi
PATENT ASSIGNEE(S): Nippon Kayaku Co., Ltd., Japan
SOURCE: Jpn. Kokai Tokkyo Koho, 5 pp.
CODEN: JKXXAF
DOCUMENT TYPE: Patent
LANGUAGE: Japanese
FAMILY ACC. NUM. COUNT: 1

AB **Brassinosteroids** are applied to plants in the presence of polyoxyethylene **sorbitan fatty acid** amphoteric surfactants to regulate plant growth without damage on the plants. (22R, 23R)-24-Epibrassinolide (I) 0.01, iso-Pr alc. 89.99, and poly(oxyethylene) sorbitan monolaurate 10 weight parts were mixed to prepare a liquid agent, which was applied to cucumber at 1 ppm (as I) to show 566.7% (based on untreated control) petiole growth.
